

Editing Page Text

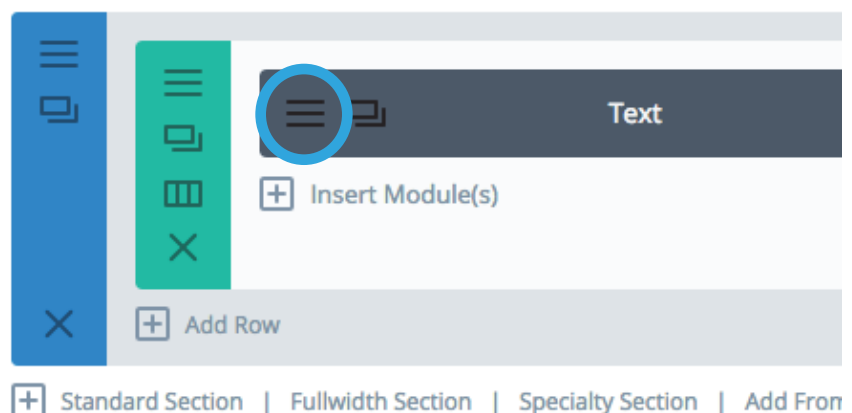

Login to your website by going to:
[www.\[yourwebsite\].com/wp-login.php](http://www.[yourwebsite].com/wp-login.php)

Once you login and you are on the Dashboard, click the **Pages** link. This will bring you to a list of all the pages on your website. Click which Page you wish to edit.

Once in the page, scroll down to **The Divi Builder area**. This is a building block representation of your webpage.

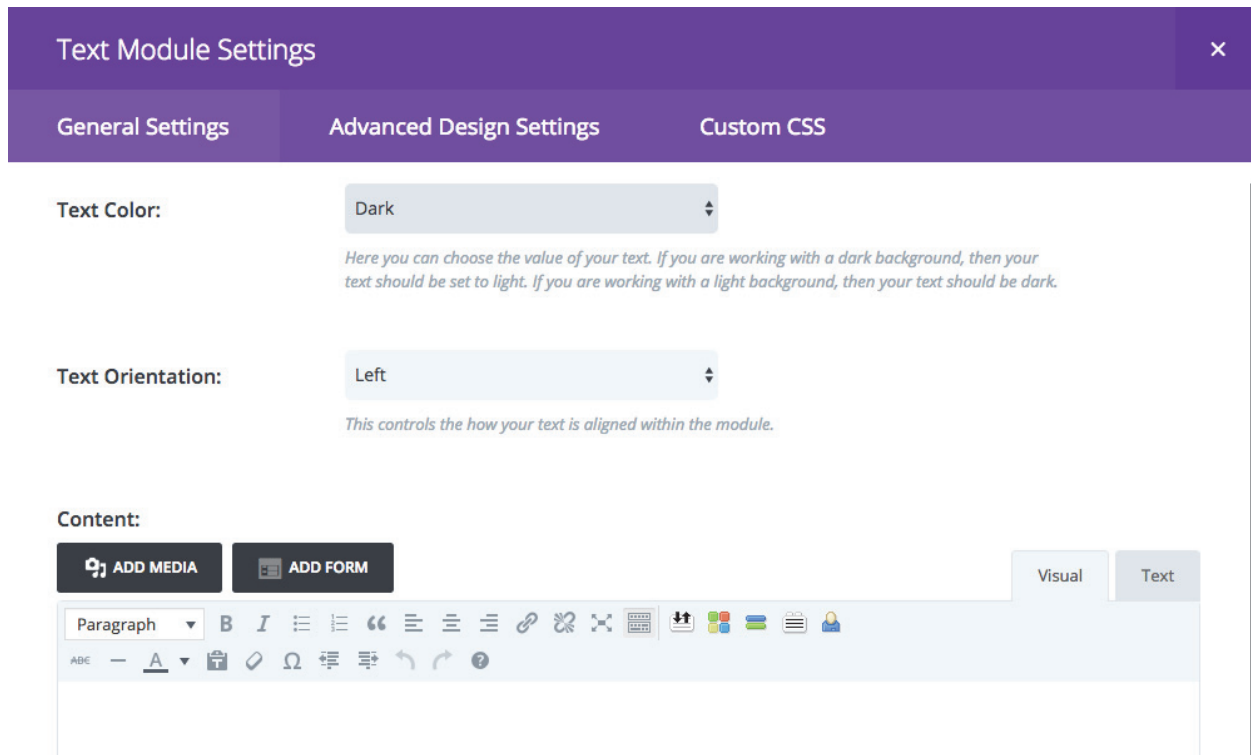

Look for the text module you want to edit. To edit the module, click the **Edit** icon.

Next Page >

The **Text Module Settings** window will pop up, and here you can edit your text.

Save your changes to the module by clicking the Save button in the lower right corner.

To make your changes live, be sure to click the **Update** button under the Publish section. If you don't click this to save the page, your changes may be lost.

View the live page to review your work!
